

## **Caravanseri Residency Programme FAQs**

### **Is there accommodation provided for the residency?**

At the present time there is no accommodation available for residency artists, however, we are happy to provide in-kind and mentoring support for individual funding applications.

### **Is there any money available for support with subsistence or materials?**

We are a self-funding artist-led community and we regret that we are unable to help with financial support for the residency, beyond the in-kind support stated.

### **Can I stay in the caravan?**

No, the caravan has been completely refitted as a working studio and you are not allowed to live in it.

### **Is the caravan wheelchair accessible?**

The caravan has a step up and narrow doors, which unfortunately means that it is not wheelchair accessible. However, if you are a wheelchair user and would like a residency with us, please apply and if your application is successful then we will make alternative arrangements for your residency work-space. Please note that our gallery, kitchen and toilets are fully accessible.

### **Does the proposal have to be about the caravan?**

No, your proposal can be about any area of practice you would like the opportunity to focus on.

### **Can I propose a collaboration with another artist for the residency?**

Yes, we have previously hosted several successful collaborations and welcome proposals from collectives or pairs of artists who wish to collaborate.

### **How many hours would I have to be on site?**

We want to be as flexible as possible, so the number of hours is up to you – however, we believe that to benefit fully from the residency and the community around you, you should expect to be present for a minimum of 25 hours per week.

### **Is there WIFI available?**

Yes, residency artists will have free access to the Cambridge Artworks WIFI.

### **How many residency opportunities are there?**

We will be selecting 5-8 artists to be in residence between May & September 2019.
